Brisbane's Magistrates Court is an innovatively designed, 14-story building that is adjacent to the Supreme and District Courts, forming the city's legal district. Lendlease, formerly Bovis Lend Lease, set out to create an environmentally sustainable series of buildings that use a variety of alternative energy sources.

OVERVIEW

Lendlease chose to use SCP Treatments during construction not only because of time and cost savings, but also because SCP is safe for both the environment and installer. Its zero VOC application provides the fastest and most superior method to cure and waterproof concrete, while protecting against all moisture-related issues. For a project focused on sustainability, reducing future maintenance of the structures was key for Lendlease.

PROJECT DATA

PROJECT
Brisbane Supreme Court and District Court

APPLICATION TYPE
Time of Placement

PRODUCT TYPE
SCP 327

DESIGN CONSULTANT
Lendlease (formerly Bovis Lend Lease)

TOTAL AREA
650,000 ft² (60,000 m²)
